EDUCATION

University of Waterloo - Bachelor of Mathematics, Coop

Expected 2030

Double Major: Applied Math in Machine Learning and Statistics, Computing minor

SKILLS & CERTIFICATIONS

Languages: Python, Go, C, JavaScript, TypeScript, SQL, Bash
AI Engineering: LangGraph, CrewAI, OpenAI Agents SDK, Model Context Protocol (MCP), Autogen, RAG
Backend & Web: FastAPI, Express.js, Node.js, Next.js, React.js, REST APIs, MySQL, Supabase
Tools: Docker, Git, GitHub, Postman, Railway, Vercel
Certifications: AWS Certified Cloud Practitioner, AWS AI Practitioner, Google Gen AI Leader

EXPERIENCE

Windscribe

May 2026 - Dec 2026

AI Engineer

Toronto, Canada

- Developed an internal **dispute management dashboard** integrating **LLM-powered** case summarization & automated decision logic for **Stripe** payment disputes, reducing the support team's manual workload by **20%**.
- Engineered an internal reporting system that analyzed dispute dashboard activity to automatically generate **weekly operational reports**, summarize dispute trends, and eliminate manual reporting for the support team.

Savi Finance

November 2025 - May 2026

Software Developer

Toronto, Canada

- Developed **RESTful APIs** in **Go** backed by **MySQL**, implementing request validation, optimized data persistence, and backend business logic for trip logging and expense tracking, supporting financial reporting for **1.5k+ users**.
- Engineered scalable backend services by designing **database schemas**, strengthening **API validation**, optimizing query performance, and debugging complex edge cases to improve the reliability of production systems.

Wanderers.ai (Visit here!)

January 2026 - Present

Founding Engineer

Waterloo, Canada

- Built a full-stack campus social platform for University of Waterloo using **Next.js**, **Supabase**, and the **Google Maps API**, enabling students to discover and join real-time location-based campus activities.

TECHNICAL PROJECTS

QuantPilot – Multi-Agent AI Research Platform [🔗](#) (Visit here!)

Python, FastAPI, LangGraph, CrewAI, OpenAI Agents SDK, MCP, ChromaDB, Next.js

- Architected a **6 multi-agent financial research platform** using **LangGraph**, **CrewAI**, & **OpenAI Agents SDK** to autonomously analyze market news, SEC filings, and financial metrics, to generate research reports.
- Engineered a **FastAPI** backend with **MCP-based** tool integrations, persistent memory using **ChromaDB**, and a **Next.js** frontend to deliver real-time AI-assisted equity research.

CareVoice – Audio Coach for Refugees [🔗](#) (Visit here!)

Next.js, TypeScript, Tailwind CSS, Google Gemini API, Web Speech API, Node.js

- Built an AI-powered language learning platform by integrating the **Google Gemini API** with a **Next.js/Node.js** application, delivering adaptive, personalized lessons for low-literacy Rohingya refugees.
- Engineered an accessible frontend using the **Web Speech API** and **Tailwind CSS**, implementing branching lesson flows and voice-guided interactions to improve usability for learners with limited literacy.

RoadSafe AI – Car Accident Severity Predictor [🔗](#)

Python, scikit-learn, Pandas, NumPy, Matplotlib

- Developed a machine learning pipeline using **Python** and **scikit-learn** to analyze **50k+ traffic accident records**, performing feature engineering and exploratory data analysis to identify factors influencing accident severity.
- Trained and evaluated supervised learning models, achieving **80% prediction accuracy** while identifying high-risk accident patterns through model evaluation and feature importance analysis.
